

SID Jamyl Ryad

Full-Stack Developer · Computer Science Engineering Student

Algiers, Algeria · +213 553 591 781
nj_sid@esi.dz
github.com/sidjamy1 · LinkedIn

I turn business needs into practical web products, from workflow design and UI through backend development and deployment. My work spans internal platforms, commerce applications, and hackathon prototypes.

EXPERIENCE

Full-Stack Developer · IB Software Aug 2025–Present

- Delivered custom platforms for professional clients by contributing to business analysis, frontend, backend, and deployment.
- Built GIG Assurance's training workflows by translating operational needs into a full-stack internal product.

Freelance Full-Stack Developer May 2024–Present

- Delivered web and mobile products by handling requirements, design, development, and deployment for Joumla Store, Myroom, Khatt Production, and IB Software.

Coordinator & Web Developer · ETIC 2024–Present

- Coordinated more than 120 people for ESI's employment fair, bringing together more than 100 companies.
- Led a 100-member multimedia team and managed communication for an audience of 15,000 followers.

SELECTED PROJECTS

ESI-MAINT

Built an equipment and maintenance workflow with intervention tracking and an AI assistant for ESI teams.

Joumla Store

Enabled wholesale ordering and delivery tracking through a mobile commerce app and admin tools.

GIG Training Platform

Enabled centralized employee training by building scheduling, progress, and administration workflows.

SolidaryPay

Won first place at Djezzy Code Fest by building a donation platform linking donors and corporate partners.

EDUCATION

Computer Science Engineering · ESI Algiers Sep 2023–Present

Third year of the engineering program.
